

Carbonite Safe Backup

Automatic cloud backup for your files,
music, photos and more

From floods and fires to computer crashes and spilled lattes, one thing is certain: Data loss is stressful. That's why Carbonite Safe™ Backup makes data protection simple—just set it and forget it. While you continue to work as you normally would, we work in the background to automatically and continuously back up your new and changed files to the cloud.

Unlimited cloud storage

Compare and find the plan that fits you best. Protect a lifetime of photos, music and irreplaceable files for one low price.

Free premium support

If you ever get stuck, our award-winning customer support team is available daily via phone, chat or email.

Anytime, anywhere access

Carbonite mobile apps allow you to view, share and download your files from your mobile devices, wherever and whenever you need them.

Simple, automatic, continuous

Set it and forget it. Your files are automatically, continuously backed up. No remembering, no scheduling.

Efficiency

Cloud backup protects against lost or damaged laptops, hardware failures and even coffee spilled on keyboards. Restore all of your files or just a few with our easy-to-use restore wizard.

Safe and secure

Before your files are transmitted, they are encrypted using 128-bit Blowfish encryption. They are then sent to our professionally managed data centers with Transport Layer Security (TLS) for added protection.
